

ASE Selected by Qimonda for Substrate Supplier Partnership

Large capacity and faster cycle time help speed time-to-market for Qimonda

Santa Clara, California, March 20, 2007 – Advanced Semiconductor Engineering Incorporated (ASE, TAIEX: 2311, NYSE: ASX), the world's largest semiconductor packaging and test company, announced today that it has been selected by Qimonda as one of its strategic substrate suppliers, supplying substrate to multiple IC production facilities worldwide. ASE was chosen for its flexibility and superior customer support provided in a rapidly changing business environment, thus enabling Qimonda to achieve its manufacturing objectives quickly and effectively.

ASE provides Qimonda with volume quantities of substrate solutions for the production of DRAM products for the PC and Server markets. With large capacity, ASE is able to offer faster cycle times while maintaining high quality standards. ASE's substrate manufacturing bases are strategically located in key geographic centers for semiconductor manufacturing, enabling Qimonda to seamlessly transfer to the next stage of semiconductor production.

"Being selected by this industry leader to deliver top quality products validates our position as a leading provider and partner for substrate materials," said JJ Lee, General Manager, ASE Electronics, Inc. "Our experience in substrate design and manufacturing enables us to support Qimonda with products that enhance their performance and manufacturability."

About ASE Group

The ASE Group is the world's largest provider of independent semiconductor manufacturing services in assembly and test. As a global leader geared towards meeting the industry's ever growing needs for faster, smaller and higher performance chips, the Group develops and offers a wide portfolio of technology and solutions, including IC test program design, front-end engineering test, wafer probe, wafer bump, substrate design and supply, wafer level package, flip chip, system-in-package, final test and electronic manufacturing services through Universal Scientific Industrial Co Ltd, a member of the ASE Group. The Group generated sales revenues of \$3.1 billion in 2006 and employs over 28,000 people worldwide. For more information about the ASE Group, visit www.aseglobal.com.
