ASE Technology Holding Co., Ltd.
Purchasing and Supply Chain Development Policy

ASE Technology Holding Co., Ltd. and its subsidiaries (collectively “ASE Technology Holding”) is among the leading providers of semiconductor assembly and test services and a major consolidator of systems and converging technologies. It is therefore our responsibility to have a positive influence on the global electronics supply chain. We regard our suppliers as long-term partners and propose to establish together a sustainable supply chain network. We also dedicate ourselves to responsible sourcing and developing technological capabilities in supply chain in order to provide responsible and first-class services continuously to our customers.

ASE Technology Holding is committed to the following:
1. Taking proactive measures to ensure our purchasing practices are in compliance with the highest standards of professionalism and business ethics, abiding by all laws and regulations where we operate, and emphasizing fair competitions among suppliers and fair business between suppliers and ASE Technology Holding.
2. Fully implementing green procurement and conducting purchasing activities in accordance with ASE Technology Holding’s conflict minerals policy and green product regulations.
3. Building stable partnerships with suppliers, pursuing mutual benefits through full communications and collaborations while emphasizing risks and benefits sharing.
4. Requiring suppliers to abide by all applicable laws and regulations, adhere to high standards of business ethics, safeguard human rights, attach great importance to physical safety and mental health of employees, protect the environment and use their best efforts to fulfill corporate social responsibility.
5. Being actively engaged in supplier management and coaching to assist suppliers with continuous improvement in competitiveness, undertaking supplier risk assessments which include delivery, quality, cost, service, technology and sustainability as criteria, and incorporating the assessment results into ASE Technology Holding’s purchase decisions. Any supplier still unable to meet ASE Technology Holding’s standards after receiving coaching will be replaced by an alternative supplier after full communication.
6. Integrating green product design into customers’ requirements as well as collaborating with customers and suppliers on developing innovative materials and equipment with an aim to advance technologies and enhance competitiveness in the whole supply chain network.
