## Climate Change Response Policy

ASE Technology Holding Co., Ltd. (“the Company”) and its subsidiaries (collectively “ASEH”) are fully committed to its net zero goals and appropriately addressing climate change. Adhering to the principles of mitigation and adaption, ASEH seeks to balance environmental conservation and economic growth while enhancing climate resilience. In support of the Paris Agreement, and in accordance with prevailing global and local environmental treaties, laws and regulations, agreements and goals, ASEH is taking action to guide its business partners and stakeholders in accelerating low-carbon transition, and fulfilling co-responsibility to protect mother nature. To that end, the Company has established the Climate Change Response Policy which has been endorsed by the Company’s Board of Directors.

ASEH is committed to the following:

- **Sustainable Manufacturing:** ASEH conducts its research and development, procurement, production, packaging, logistics and services in accordance with the Company’s “Environmental Responsibility Policy,” and all applicable laws and standards throughout the entire lifecycle. We will continually enhance our energy efficiency, and provide a manufacturing service that offers green solutions and is low carbon based on low-energy consumption, less resource-intensive and pollution-free.
- **Emphasizing Energy Efficiency and Low-Carbon Transition:** ASEH aims to improve resource and energy efficiency throughout its entire operation. We seek to gradually reduce dependence on fossil fuels, and use 100% clean and renewable energy to achieve our net zero vision.
- **Enhancing Climate Resilience:** ASEH will conduct identification of climate risks and opportunities to develop climate plans, and dedicate to the advancement, research and development of climate science and greenhouse gas reductions. This will further strengthen the climate adaptation capabilities of ASEH's operations and value chain stakeholders, leading to a reduction of overall risks in the industry chain.
- **Transitional Justice:** ASEH will not support nor associate with organizations that contradict international initiatives or the Company’s climate policy. From actively facilitating the industry’s transition, to stakeholder collaboration and exerting social influence, we remain committed to upholding the principles of social prosperity and value co-creation.
